TCPA Litigator List

The Features It Has to Offer Clients

Enhanced online phone scrub

Using our convenient online phone scrub service, users can easily create a clean list of numbers. Just log in to your account and upload the CSV or Excel file - it's that simple! Our advanced technology also provides you with an additional report containing all TCPA-related bad numbers for comparison. Plus, multiple phone columns can be addressed simultaneously from just one CSV or Excel file for maximum efficiency.

API Real Time Scrubbing

TCPA API has revolutionized the way businesses are dialing out. When a user initiates an outgoing call, their API instantly checks against its massive database to make sure that phone number hasn't been listed in any litigator list - if it is found there, then the connection is blocked on-the-spot for maximum protection.

Single Name & Number Look up

TCPA Litigator List is an ever-expanding resource for all those related to the realm of Telephone Consumer Protection Act (TCPA) litigation. With over 600,000 names in its register — from TCPA Litigators, TCPA attorneys, and trolls — this searchable directory facilitates easy access to vital contact information via a single number lookup feature.

Endpoint API

Endpoint API offers a unique service to TCPA Litigator List users, providing quick and efficient scrubbing of large data sets - saving both time and money! Unparalleled quality results make it an excellent choice compared to traditional phone list uploads or real-time scrubbing.
